

SWE – ROUND TABLE FUTURE OPERATIONAL SERVICES

FUTURE OPERATIONAL SERVICES

- **REFERENCE** : Operational Space Weather services via EU portal developed by ESOC in the frame of SSA/SWE program
- **MAIN QUESTIONS** :
 1. What about current status ? Progressive availability or final delivery ?
 2. In terms of the usability / operability, are the final EU users in the loop ? What about the standardization of files formats ? Ergonomy of the tool ?
 3. Who will be the final consumers of the these data ? Operators and/or Flight Dynamics experts ?
 4. What about consideration of F30 versus F10.7 ? Choice of the operator ?
 5. What about evaluation / calibration of the provided services ? By who ? When ? How ? FDS & OOC ?
 6. How do we organize ourselves to adopt these services in replacement of our current practices ?
 7. Will the EU SWE services also be the baseline for all the collision risks management or not ?
